These costs are paid out of the assets of the Managed Portfolio not your account.

3 About the Investment Manager

Mason Stevens Asset Management

Mason Stevens Asset Management (MSAM) is the investment management arm of the Mason Stevens Group. MSAM was established to provide investors with the opportunity to access professionally managed investment strategies and funds that are typically reserved for institutions and professional investors.

MSAM works with a range of clients including financial advisers, financial intermediaries, family offices and selected wholesale investors in the delivery of tailored investment solutions.

Investment process

The Managed Portfolio seeks to invest in a risk-adjusted portfolio of AUD-denominated fixed income securities unless stated otherwise. Account monies are invested as per the securities and weights as defined in the Managed Portfolio, with the Managed Portfolio reflecting the current investment views and strategies of the MSAM investment team.

While the primary investment objective is to actively monitor, manage and reposition a portfolio of securities that meets the investment objectives over the suggested investment time frame, the MSAM investment team will act on shorter term market opportunities it has identified to maximise returns.

The Investment Manager will have full discretion over the timeframe of when monies are invested and will determine security selection based upon the following criteria:

- Assessed quality of the underlying business, including appropriate ratio analysis;
- Sustainability of coupons or other distributions (if applicable);
- Rating of the underlying issuer and rating of the specific issue, if any;
- Balance sheet ranking, if applicable;
- Liquidity of the particular issue;
- Duration of the particular issue; or
- Historical volatility of the underlying securities.

In addition to in-house capabilities, the Investment Manager will draw on a wide range of research sources. This will include leading analysts from the major broking houses and investment banks, company briefings and meetings with company executives and independent specialist Australian and international market analysts.

Unless stated otherwise, all securities in the portfolio must have a minimum rating of investment grade or higher by a reputable rating agency at the time of purchase.

It is expected that the performance will be predominantly income in nature however capital gains (and losses) can also be made.

How does the Investment Manager manage risk?

The Investment Manager is unable to eliminate all investment risk, but does analyse, manage and aim to reduce the impact of risks by actively monitoring investment markets and portfolios and through the use of carefully considered investment guidelines.

Labour standards and environmental, social and ethical considerations

The Trustee does not take into account labour standards, environmental, social or ethical considerations when making the investments available. The approach in relation to any consideration of labour, environmental, social or ethical standards as part of the investment decision making process for the portfolio is left by the Trustee to the individual discretion of the Investment Manager. This investment strategy does not directly measure or incorporate labour, environmental, social or ethical standards as part of the investment decision-making process.

The Investment Manager is aware that these issues can influence social, business and investor outcomes; in certain circumstances they may consider these issues when making an investment decision. The Investment Manager's consideration of labour, environmental, social or ethical considerations are in its own right and not on behalf of the Trustee.

Execution of strategy

Mason Stevens Limited and its associated entities have been appointed by the Trustee to provide various services in relation to the Fund, including promoter, investment management and custody services. Mason Stevens and the Administrator are responsible for implementing the investment instructions of the investment manager by buying and selling assets, taking into consideration timing, trading costs (such as transaction fees and currency costs, if applicable) and the mandate of the portfolio. In certain circumstances Mason Stevens has the right to vary the managed portfolio. By investing in this managed portfolio, you instruct Mason Stevens and the Administrator to buy and sell assets on your behalf through the managed portfolio as advised by the Investment Manager.

Risks

Before you consider investing in this portfolio, it's important you understand the risks that can affect your investments. A summary of key risks is in the PDS.

See the 'Risks' section in the PDS. Please note this is not an exhaustive list of all the risks. The risks relevant to this portfolio reflect the underlying investments. For information about risks regarding your personal situation speak to your adviser.

Trade notifications

When the Investment Manager trades, or rebalances the portfolios, Mason Stevens (through the Service) may send you an advice notifying you of the trades being undertaken. This is called a 'trade notification'. The rebalance and reallocation of managed portfolios may occur regularly and you may receive a trade notification each time a rebalance or reallocation occurs.
