## Portfolio and market returns

The portfolio underperformed the S&P ASX200 Industrials Accumulation benchmark during the June quarter. Stock selection within the sectors Industrials, Communication Services and Consumer Staples contributed the most to performance during the quarter, while weaker selection within the sectors of Information Technology, Financials and Consumer Discretionary had a negative impact. The portfolio's allocation to the sectors of Consumer Staples, Real Estate and Utilities added to performance during the quarter, while allocation to the sectors of Consumer Discretionary, Energy and Health Care detracted value overall. Individual holdings in REA Group, Aurizon Holdings and Seek made a positive contribution to performance. Overall exposure to Link Administration Holdings, Tabcorp Holdings and CYBG had a negative impact.

## Performance since inception<sup>1</sup>

<sup>1</sup> The Portfolio's benchmark is the S&P/ASX200 Industrials Accumulation Index. Past performance is not a reliable indicator of future performance and may not be achieved in the future. All information provided in this Report is correct at the date of this report. Returns are calculated net of management, administration, custody and transaction fees, and assume the reinvestment of all income (but not franking credits). Inception date of the Portfolio is 30 September 2017. Actual individual returns of each client's portfolio will differ depending on factors such as date of initial investment, timing of transactions, inflows and outflows, other fees and any customisations. Please refer to the relevant Investment Mandate for full information on product specifics, including all fees and costs.

## Investment objective & strategy

The investment objective of the DNR Capital Australian Equities Income Managed Portfolio is to outperform the S&P/ASX 200 Industrials Accumulation Index (before fees), and deliver higher levels of income relative to the benchmark over a rolling three-year period.

The investment strategy of the Managed Portfolio results in a portfolio that is high conviction and invests for the medium-to-long term. The portfolio construction process is influenced by a top-down economic appraisal and also considers the risk characteristics of the portfolio such as stock and sector correlations.

The stock selection process has a strong bottom-up discipline and focuses on investing in quality companies at reasonable prices. The Managed Portfolio also has a preference for companies that have high and sustainable dividend capability, strong profit to cash conversion, and relatively assured earnings growth.
